The Care *Hub*

You may not think of yourself as a caregiver, but everyone needs support sometimes, whether for themselves or someone they love. The Care Hub brings Care Experts and easy-to-use digital tools together in one place to simplify care and make life easier.

TOOL	WHAT IT DOES
Calendar	Shared scheduling for appointments, care tasks and coordination, with the option to ask your support network for help when you need it.
Service Tracker	View active cases and care plans, start new requests and stay connected with your Family First Care Expert.
Caregiving Portfolio	A shareable caregiving record that organizes providers, contacts and essential care information in one place.
Documents	Secure document storage so important files and records are only a click away.
Support Network	Invite others to the Care Hub, set access permissions, coordinate tasks and share updates, so care doesn't fall on you alone.
Care Library	A digital library of resources written by experts, so you have trusted, accurate guidance in one place instead of scattered online searches.
Build Your Skills	Assessments based on common scenarios walk you through a series of questions, identify risks and give you customized recommendations.
Find Resources	Search by ZIP code for vetted clinical, financial, legal and community resources near you.
Care Risk Index	Our Care Experts use the CRI to help identify when caregiving is becoming harder to sustain, so support can begin early and be measured effectively. You'll take a short CRI survey at the start and throughout your work with us.

Get Support

To speak with a Care Expert, call **877-585-7090**, Monday–Friday, 8 AM–8 PM ET. To learn more or get started online, visit **family-first.com/member-access**.
